# Danger

## The Waifs

Danger...danger ahead
We missed the signs,
We lost all we had of you
I know you had time on your ownBut you couldn't ever say that
You didn't have a place to come home to
But you never came homeDanger
How could anything get so bad
You turn down all the choices that you have
And run toward the darkest light you find
With hope it will ease you aching mindDanger ahead we missed the signs
And now you've left us here
To work out all your reasons
We comb the past
