

# SHh

## Saosin

don't let them know  
you're watching the situation crumble (situation crumble)  
these things, they take time and they know  
yes they know they should be better now she's watching me  
awkwardly from a distance

---

is there something more i should have known  
i never had wondered they took his crown  
there's nothing more left of him now  
(and he will be ok)  
i appreciate now that they choose to ignore  
i can set her free to go without a payment  
she's watching me  
awkwardly from a distance

---

is there something more i should have known  
i know that i wonder will she go or follow  
follow, please follow me home (me home)  
follow, please follow me home this won't end like last time  
the things you swore  
they never made me feel anymore she's watching me  
awkwardly from a distance

---

is there something more i should have known  
i don't need to wonder
