

# Mercy

## Active Child

I came back home and you said to me  
I've come so far came so close to finding you  
And your love will help me through  
Your love will guide me to you  
Even when I try to take control  
Need your love, need your love  
There's a riddle inside that I'll never know  
Need your love, need your love It's your love  
You can do it, but you know it won't stop  
Help me through  
Looking at it from the bottom to the top  
It's your love  
You can do it, but you know it won't stop  
It guides me to  
Looking at it from the bottom to the top After some time I recognized that it was for real  
Real, real  
You opened my eyes and I could not deny  
How you make me feel  
All of your ways, your ways  
Your love  
You can do it, but you know it won't stop  
Looking at it from the bottom to the top now  
You can do it, baby show me what you got  
Gimme what you got now  
It's your love  
You can do it, but you know it won't stop  
Help me, you help me to get through  
Looking at it from the bottom to the top now  
It's your love  
It guides me, it guides me back to you  
You can do it, but you know it won't stop  
You
