

# Chemical Dizzy

## The Casket Girls

What came first the count or the number  
Chemical dizzy, love will put you under  
Animal magnetism to the thunder

What came first the sun or the summer  
Numbers can explain the universe connection between the mind and the  
dream  
and numbers can't explain the universe connection between the mind and the dream  
You and I are like water and  
fire

Opposites only exist with each other  
Dark and light give rise and turn  
Are you doing alright?

Do you feel the burn?  
There's nothing more dangerous than a wounded heart  
Beautiful queen but cruel like a demon  
in between the question and a reason  
Doesn't it seem it changes with the seasons?  
Black and white, we're grey blood bleeding
