

Nights Like This

W. Darling

Right here face to face in your sheets
Were tucked underneath all these city street lights
where everything starts with your kiss
Didn't I do it all for the nights like this So I built up a home in your chest
You gave me the space so I put my bags down
Now empty with boxes unpacked
I didn't know it was a month to month rent Didn't I keep hoping that your heart would stay open
For more than the night
Didn't I
Didn't I
And when you said you're sorry, It was a likely story
But I ran to your side like a ghost in the night When the light is so bright
You get a little bit
Little bit blinded
When you're lifted so high
Falling feels like flying
When you're lost in those eyes
Feels like you might be gone forever
So, one last kiss then let it end on a night like this With your hands held up over my eyes
All the dark looks like some kind of starry sky
But were on the edge of a burning high rise
And I know that I did it all just to lose your grip Didn't I keep hoping that the truth meant nothing
I heard what you said but I know what you did
Didn't I keep trying even when your lies were lying
Like a thorn in my side, every time, didn't I? When the light is so bright
You get a little bit
Little bit blinded
When you're lifted so high
Falling feels like flying
When you're lost in those eyes
Feels like you might be gone forever
So, one last kiss then let it end on a night like this Didn't I keep hoping that the truth meant nothing
I heard what you said but I know what you did When the light is so bright
You get a little bit
Little bit blinded
When you're lifted so high
Falling feels like flying
When you're lost in those eyes
Feels like you might be gone forever

So, one last kiss then let it end on a night like this
