## Now the Action Is On Fire

## **Biffy Clyro**

I'm cagey about stories involving time, it's like I'm slowly burning, breathing crimes This is all right, burn the action now, tell me how you feel, burn the action now Rotations take hold, clear but filthy cries This is all right, burn the action now, tell me how you feel, burn the action now...this is all right, all right When the inner energy pollutes my soul with selfish needs and small conspiracies unique from loyalty And over and over and over and take all I have and under and under and under and Could you make it any easier so we can set this on fire This is all I have and over and over and over and, take all I have And under and under and under and And over and over and over and take all I have to decide and all I have We'll change the world how we want to, we'll change the world inside you You changed the world, you changed the world, burn the action, burn the action burn the action now!
