Ghost Lights

Woodkid

Waking up in a world surrounded by flames
Where everything I liked is about to fade
How could you be the one if you're not the same
If in the hands of gods you have lost your wayHow ever fast I dance to make the sun shine
I will never fall down
No matter what it takes, I'll try to save the ghost lights
How ever hard I pray to remake you mine
I will never feel down
No matter what it takes, I'll try to save the ghost lightsWaking up in the fog, the dust and the pain
And of the sunny days, no traces remain
How could you be the one if you sail away
Without you I can't stand the sound of the rainHow ever fast I dance to make the sun shine
I will never fall down
No matter what it takes, I'll try to save the ghost lights
How ever hard I pray to remake you mine
I will never feel down
No matter what it takes, I'll try to save the ghost lightsHow ever fast I dance to make the sun shine
I will never fall down
No matter what it takes, I'll try to save the ghost lights
How ever hard I pray to remake you mine
I will never feel down
No matter what it takes, I'll try to save the ghost lights
