

# Lighthouse (Punches Remix)

## New Villager

Keep it up don't stop don't loose your place (x6)  
How are you gonna get your hands  
Inside the real thing  
When you go and leave your mind sleepin'  
Time to understand your place  
Your trees and your buildings  
When the time to dream is almost over  
Go find the silver dolls head  
Put it on your own head  
See the people call you  
sad and lonely statue  
Go out go sleep run to the light house  
Go out go sleep run to the light house  
See what you never  
See, see what you never  
Time to light the fires  
Built a deer inside our homes  
A world upon the rooftops  
We see the people stirring  
Time to understand your  
place and tress and buildings  
Well the time to dream is almost over, over  
Go out go sleep run to the light house (lighthouse)  
GO, go out go sleep run to the light house  
See what you never  
See, see what never (never)  
Go out a break out the dog house  
You don't have to stay around  
The old town that makes you think of the movie theaters  
You got no time left to play it slow  
Go home just play the goat  
Take three steps on the right road  
No time to hold hands with old hands  
You know how to be the one to  
Who Where's to build a home with a baby in it  
Let old things drop  
Old people never admit it  
Go home just play the goat  
Take three steps on the right road

Go (go go go go)  
See the people call you  
Sad and lonely statue  
Go out go sleep run to the light house  
Go out go sleep run to the light house  
See what you never never (never never)  
Go out go sleep run to the light house  
Go out go sleep run to the light house  
See what you (what you what you)  
See see  
Keep it up don't stop don't loose your place (x15)
