

# Johnny 7

## Stiff Little Fingers

I remember back so long ago  
Where I went you'd always go  
Never left my side, I never felt alone  
Just you and me always on our own  
Those were the days I loved but now it seems so strange  
It's all so different I guess everything has to change Johnny 7, now where are you  
Johnny 7, help me see it through  
Johnny 7, I need you right by my side  
Was all so easy way back then  
I pull the trigger just fire and end  
No need to run Johnny 7 no need to hide The years go by and you are gone  
Never thought I'd miss you for so long  
A world like this needs a seven too  
I guess I'd still run back to you  
They told me I'd forget as time goes by  
But they can say what they want I know I'll never try Could this all be a dream  
So what I'll live my dream
