

She's Gone Away

Nine Inch Nails

You dig in places till your fingers bleed
Spread the infection, where you spill your seed
I can't remember what she came here for
I can't remember much of anything anymore
She's gone, she's gone, she's gone away
She's gone, she's gone, she's gone away
Away
Away
A little mouth opened up inside
Yeah, I was watching on the day she died
We keep licking while the skin turns black
Cut along the length, but you can't get the feeling back
She's gone, she's gone, she's gone away
She's gone, she's gone, she's gone away
She's gone, she's gone, she's gone away
Away
Away
Away
Away
(Are you still here?)
