

# War of Change

## Thousand Foot Krutch

It's a truth that in love and war,  
World's collide and hearts get broken,  
I want to live like I know I'm dying,  
Take up my cross, not be afraid[Chorus]  
Is it true what they say, that words are weapons?  
And if it is, then everybody best stop steppin',  
Cause I got ten in my pocket that'll bend ya locket,  
I'm tired of all these rockers sayin' come with me,  
Wait, it's just about to break, its more than I can take,  
Everything's about to change,  
I feel it in my veins, its not going away,  
Everything's about to change. It creeps in like a thief in the night,  
Without a sign, without a warning,  
But we are ready and prepared to fight,  
Raise up your swords, don't be afraid,[Chorus] This is a warning, like it or not,  
I break down, like a record spinning,  
Gotta get up,  
So back off,  
This is a warning, like it or not,  
I'm tired of listenin', I'm warning you, don't try to get up, There's a war going on inside of me tonight (don't be afraid) There's a war going on inside of me tonight (don't be afraid) Wait, it's just about to break, its more than I can take,  
Everything's about to change,  
I feel it in my veins, its not going away,  
Everything's about to change,  
It's just about to break, its more than I can take,  
Everything's about to change,  
I feel it in my veins, its not going away,  
Everything's about to change.
