

# Hold On to Me

[Rachel Potter](#)

Seems like life gave you an unfair deal  
Kept you trapped inside a battlefield  
Left with wounds that still haven't healed  
But if I could take away your pain  
Bring out the sunshine and stop the rain  
I'd spend the rest of my days protecting you I would march straight into Hell, fight the Devil all by myself  
Because there's nobody else to take the place of you Hold on to me when you're feeling low  
Hold on to me, never let me go  
Without you my world would be empty  
So baby hold on to me Back when heroes weren't make-believe  
You and I could conquer anything  
We'd fly away on angels wings  
But now you're lying on the floor  
Not sure what's worth fighting for  
Can't be pushed around anymore But I would climb those castle walls  
Kill dragons and make mountains fall  
Because all those things they seem so small, compared to losing you Hold on to me when you're feeling low  
Hold on to me, never let me go  
Without you my world would be empty  
So baby hold on to me So don't you dare give up this time  
If you're out of strength you can take mine  
Yeah, you can have mine Just hold on to me when you're feeling low  
Hold on to me, never let me go  
Without you my world would be empty  
So baby hold on to me  
Without you my world would be empty  
So baby hold on to me
