

# Swallows Me Whole

Lori McKenna

You say you think you can help me  
Think of me as someone who bleeds  
Well, I never told you to love me  
That's your sort of greed I can make my own decisions  
I can do what I want to do  
And I don't have to share my addiction  
With any of you And I'll be just fine, out of my mind  
I like it this way, I know when to pray  
And I'm in control till it swallows me whole I know you'd like to control me  
You always need to be right  
Because I'm late once or twice  
Lose a job or stay out all night But I can see high above it  
The world is a boundary for you  
And I know that you'd like  
To see through it the way that I do I'll be just fine out of my mind  
I like this it this way, I know when to pray  
And I don't need any until I need more  
I said I was sorry a hundred times before  
And I'm in control until it swallows me whole You say that you have to leave now  
You can't stand the things that I do  
And you know that I'll need this more  
Than I'll ever need you And I'll be just fine, out of my mind  
I like this it this way, I know when to pray  
And I don't need any until I need more  
And I don't need any until I need more  
And I don't need any until I need more And I'm in control  
Till it swallows me whole  
Till it swallows me whole  
Swallows me whole
