

Watching the World

Mr. Mister

Rockets launch us to outer space
Far away from the human wasteland
Bringing heaven to other world
Abandoning the home fires of our birth
There are fools who believe we can't live here as one
There are wise men who say it still can be done
Who is watching the world?
Who is changing the balance of power?
Who is watching the world?
Are we building a future or just standing still?
We will harvest your fields of wheat
For the promise of food to eat
Forging ploughs of swords of war
We'd stop all this fighting and open the door
Only fools would believe we can't live here as one
Who's to say it cannot be done?
Who is watching the world?
Who is changing the balance of power?
Who is watching the world?
Are we building a future or just standing still?
Who is watching the world?
Who is changing the balance of power?
Who is watching the world?
Are we building a future or just standing still?
Watching the world
Who is watching the world?
Only fools would believe we can't live here as one
Who's to say it cannot be done?
Who is watching the world?
Who is changing the balance of power?
Who is watching the world?
Are we building a future or just standing still?
Who is watching the world?
Who is changing the balance of power?
Who is watching the world?
Are we building a future or just standing still?
Who is watching the world?
Watching the world, watching the world
Who is watching the world?
I don't see this world changing, yeah
Who is watching the world?
Watching the world, watching the world
Who is watching the world?
[Inaudible]
