

Me and My Black Metal Friends

Atom and His Package

In the mountains of Norway, where the weather is cold,
there's nothing to do, except kill each other, and play guitars in the snowCorpse paint is a scary name for make-up it's what they wear,
they resemble ink and dagger, if ink and dagger had long hairthey're pretty evil, and they do not like god,
i don't care if they burn down churches,
but they'd better not fuckin' touch a synagougei befreinded them
bye bye mom, it's now me and my black metal friends
i befreinded them
bye bye franklin, it's now me and my black metal friendsthey have names like igor, Helthor, Angor,
but then again, it's not exactly like "living color",
i kinda hope they move here, so i don't have to pay import prices,
but i kind of fear them being near me,
because, they're not nicei befreinded them
bye bye mom, it's now me and my black metal friends
i befreinded them
bye bye franklin, it's now me and my black metal friendscome on, ilene,
come on, ilene!
