

We Have All the Time in the World

Michael Ball

We have all the time in the world
Time enough for life to unfold
All the precious things life has in store
And we got all the love in the world
If that's all we have
You will find, we need nothing more
Every step of the way will find us
With the cares of the world far behind us
We have all the time in the world
Just for love, nothing more, nothing less
Only love
Every step of the way will find us
With the cares of the world far behind us
We have all the time in the world
Just for love, nothing more, nothing less
Only love
Only love
