

We Need No One

Club America

(We need no one) We need no one to travel the world
Lights brought us here
Just dreams could only hold us for so long The stars can guide us to travel the world
Just look up
We are both under the same starry sky Surrounded by people
But you're the one that can get me high
Surrounded by people
But you're the one that won't pass me by There is still much more to be done
In our hearts
And I'll find a way not to be misguided We need no one to travel the world
Ain't much fast or slow
We'll find together the sky that will make us grow
