

# My Foundation

## Packy

[Verse 1]

I know I don't call enough  
I know you worried 'bout me, out here all alone  
I hope I fall in love  
I'll be alright though, I'm in no hurry  
Happy chasing down my dream, I'm getting there, don't worry ma  
Imma be there someday, imma settle down, you wait and see  
I'll be successful if I give back half of what you gave to me  
And I just wanted you to know  
Yeah I just wanted you to know  
You're my hero ma, you really are, I'm so damn proud of you  
And I see Katie doing good, I know she learned a lot from you  
Won't forget the time I caught you crying cause I caught you lying  
Told me you were laughing  
You were always trying to hide it  
I thought I was losing you in high school, doctors couldn't heal it  
Told me it might take your health, but it would never take your spirit  
You were right, you're a fighter, you're the strongest woman I know  
Even when I'm far away, you're everywhere that I go

[Hook]

I just wanted you to know  
Yeah I just wanted you to know  
I could never put a price on what you gave to me  
And I just wanted you to know  
Yeah I just wanted you to know  
How much I appreciate and you are my foundation

[Verse 2]

It's not the life you would have chose for me, I know it's not  
But imma still go and make you proud hopefully  
I'll always be the way you raised me  
I gotta do it my way though or I'll go crazy  
Lately I've been coming face to face with everything you prepped me for  
You might think I don't, but I remember what you said before  
And I just wanted you to know  
Yeah I just wanted you to know  
You taught me how to be a man, you always treated mom right  
Nobody could know the half

You never needed limelight  
I learned more than I can put in words just by watching you  
Ironic this music the way I get that across to you, isn't it  
Since a kid I've been listening  
Your dad's been sick for years, you're like the only one who visits him  
I know it's not easy, his mind is gone and you miss him  
You taught me family is family and mine's in Michigan and you should know

[Hook]

I just wanted you to know how much you mean to me
