

All Day

Young Ejecta

don't be silly, old boy
that's what i'm here for
i'm gonna follow you anyplace
i'm like a nightingale i am from deep space
i could just fly away but i stayed the sun shines all night
over somebody else, somewhere
covered by the light, and the dark
and the black, and the white
oh! who cares! the sun shines at night
all over someone else someplace
but it shined on us all day
every little noise i make goes unseen
im having the hardest time learning to walk
so come to me, i know you can
oh! the way you act
when you want your lover to be your man
