Everywhere I Look

Donkey Punch

I met her at a party just like any other
Our eyes fell upon one another
I can't stop dreaming of
The way she looks and talks to me
The way she smiles she's in my dreams
The way she moves she's never there
The way she laughs she's everywhere, everywhere I look
And would she remember who I am I wonder
If I could I'd call he if I had her number
It seems I can't recall the sound of her name
Intoxication's clouded my brain
I just can't think the same
She's everywhere I look
But I can't find her
