

Dragon's Skull

Steel Dragon

Imagine the darkest cave
Visited only by the brave
So mysterious and damp

So far away
Beyond the mountains and the seas
Magic atmosphere in the air

Deep in there, what will be found?
The smell is a stench never felt by man, before
It's too calm to be real
Curses from ancient times lie here asleep

The gate of freedom, they say
Can chase the fear away
And rescue mankind from slavery and pain

It was written in the book
The vision came real
A sign in the shape of a star appeared

If you be quiet now
You will hear a
Whispering voice
From times that have
Passed away long ago
And you will face
The magic of
The dragon's skull

As you stand
At the entrance, you will see
Eyes glow in the dark

You'll be afraid
But go on 'cause if you stop
Your story ends

Deep in there, what will be found?
The smell is a stench never felt by man, before

It's too calm to be real
Curses from ancient times lie here asleep

The gate of freedom, they say

The dragon at the gate
Will try to make your journey short
So fight my friend
Fight and save us all
