See it in your eyes
Feel it in my head
Feeding me your pain
Falling out againSmall strong blow
Small strong blowSee it in your eyes
Feel it in my head
Feeding me your pain
Falling out againSmall strong blow
Small strong blowDone the same old route before
Leading us to angry shores
Insecurities await
Confusion hurting us againLet's fight and talk
That's it, fight and talk
Let's fight and talk
That's it, fight and talkYou start to shout
You give it, bring it out
We scream and pout
Reacting, feeling doubtWe're testing weight
What's it all about?
It takes the blame
While we shout it outLet's start again
And try to talk it out
Let's fight and talk
Let's start something elseMeeting on the way
Excuse this reach in time
Got sunshine on my mind
Can finally hear your face in my mindSeen it there before
If you only knew my mind
Excuse me perfectly
My world will reach in time
