Take It Off

Sam Grow

That wrap awraped around the top of that bottle. The smilest smile of somebody else all day. The weight of the worry bout watcha got comin tomorrow. The little gold chain around your neck those high heel shoes and that little black dress take it off take it all off let it fall off your shoulders lay down lay it all down lay it down next to me let it go let it all go till it can't get no closer everything every little thing ain't comin inbetween you and me take it off take it off take it all off. That makeup you don't need to make you pretty those fancy pillows you like on the bed any thought that I am crazy bout you with your inabitshins and your fears you bring them all all over here take it off take it all off let it fall off your shoulders lay it down lay it all down lay down next to me let it go let it go till we can't get no closer. Everything every little thing in common in between you and me take it off take it off take it all off

Oh yeah. Take it off take it all of let it fall off your shoulders lay it down lay it down girl lay it down next to me let it go let it go till we can get no closer yeah everything every little thing and come in between you and me take it off take it off take it all of yeah take it off take it off take it all off
