

# Again and Again

## Union 13

We're back to haunt you like no one before  
It's all truth no lies, go out and explore  
Make yourself the one, don't surrender your soul  
Compulsions lie deep and are hard to control  
Like serpents in a pit with you stuck inside  
We're bitten by problems that always arrive  
Emotions will hurt and don't fail to subside  
See we're all the same when we start to confide  
We try to live our lives trouble free  
The price we pay for our humanity  
We try to work ourselves  
Out of the tangled webs we weave  
To no avail we fail again and again  
As if you didn't know that there is something wrong  
Look around for yourself and then ask, "For how long  
Can we live like this with a will to go on?"  
Trying to make a life now days, sure isn't fun  
We try to live our lives trouble free  
The price we pay for our humanity  
We try to work ourselves  
Out of the tangled webs we weave  
To no avail we fail again and again  
These themes are put forward to be by your side  
When we grasp the concept we've finally arrived  
This is just a take of what I see of life  
I believe what I see with my truthful eyes  
We try to live our lives trouble free  
The price we pay for our humanity  
We try to work ourselves  
Out of the tangled webs we weave  
To no avail we fail again and again
