

# Low Society

## Heaven 17

A judge a dentist or physician  
In this low society  
Trade ambition for position  
In this low society  
Have you heard it's in the stars  
Next july we collide with mars  
Have you heard it in the bars  
In this low society  
No more pay and lots of leisure  
In this low society  
Low society I'm just doing what I can  
In this low society  
But I'm an incidental man  
In this low society  
I give away what others sell  
The secret's yours so never tell  
'cos if you do you'll go to hell  
Low society  
Side by side and always tired  
All for one and no-one hired  
All that's left is love inspired  
Low society  
And when the party is complete  
And you're still standing on your feet  
The taste of victory is sweet  
Low society  
And darling don't forget  
In this low society  
To turn off your t.v. set  
In this low society  
The most important thing at all  
In this low society  
Is not to stand too tall  
In this low society  
In this world that never learns  
I can see rome as it burns  
All the passion and the power  
Turns to ash within an hour  
No more play and no more pleasure  
In this low society
