

# Little Town

## Lonestar

If you blink, you might miss it  
Population 803  
Five miles long, four miles wide  
Feels just right to me  
Where a handshake still means something  
An' the little man still counts  
Water tastes like it's supposed to  
Yeah, folks 'round here are proud  
To be from a little town  
Well, the stars, they just seem brighter  
An' the pace is nice an' slow  
An' families stay together  
God must be smilin' down here on little town  
There's a cardboard lemonade stand  
At the end of our drive  
For fifty cents, they'll fill you up

He's seven an' she's five  
An' in the Fall, there's Football Fridays  
We pack the kids an' we head out  
We climb the stands and pass the band  
And join the hometown crowd  
An' scream for little town  
Well, the stars, they just seem brighter  
An' the pace is nice an' slow  
An' families stay together  
God must be smilin' down here on little town  
Aren't you glad we settled down here in little town?  
If you blink, you might miss it  
Population 803  
Five miles long, four miles wide  
Feels just right to me
