Maya the Psychic

Gerard Way

We're not just dreamers, we're the kind that comprehend
We gather up our forces
She's busy hearing voices again-
Pneumonic-screamers came to gather up our friends
If giving in is pointless then get out of bed or this might be the end
Voices hearing you loud
We're taking the sound back with us
Now I'm hearing you loud
We're coming around
Just give us more
You teenage believers, rallied up against the fence
Use weapons of clairvoyance
You adolescent strike-force against
Metallic deceivers
From a planet far away
But when you read my fortune are we running home or running free today?
Voices hearing you loud
We're taking the sound back with us
Now I'm hearing you loud
We're coming around
Just give us more
Are you hearing voices again?
Are they with you, and are they giving you commands?
I know you've had choices to make
But I'm with you-
You're never facing them alone today
Voices hearing you loud
We're taking the sound back with us
Now I'm hearing you loud
We're coming around
Just give us more
Are you hearing voices?
Are you waiting for this?
