How I Love You

Rob Laufer

They say one day
You'll look out your door
And you'll find you right where you belong
And in that moment you'll know love so sweet
And the feeling that you've known it all along{Chorus}
Like the sun
Breaking through clouds
Shining out loud
That's how I love you
Like the dawn
Bright and new
Honest and true
That's how I love youYou can wander
'Til you've worn out your shoes
Round in circles just to finish where you start
My time was squandered
Until I found you
And I finally felt the beating of my heart{Chorus}Solid as the ground below us
Softer than a sigh
Constant as the northern star, yeah
Open as the skyThey say one day
You will find someone
Together you will sail across the sky{Chorus}
