

# How I Love You

**Rob Laufer**

They say one day  
You'll look out your door  
And you'll find you right where you belong  
And in that moment you'll know love so sweet  
And the feeling that you've known it all along{Chorus}  
    Like the sun  
    Breaking through clouds  
    Shining out loud  
    That's how I love you  
    Like the dawn  
    Bright and new  
    Honest and true  
    That's how I love youYou can wander  
    'Til you've worn out your shoes  
    Round in circles just to finish where you start  
    My time was squandered  
    Until I found you  
And I finally felt the beating of my heart{Chorus}Solid as the ground below us  
    Softer than a sigh  
    Constant as the northern star, yeah  
    Open as the skyThey say one day  
    You will find someone  
    Together you will sail across the sky{Chorus}
