We're Only Science

Dot Allison

We're only scienceWe're only science
We're only science
We're only science
We're only science
We're only scienceWe're only science
We're only scienceLook into my eyes for the last time
Can you read my lips, you're over time?Look into my eyes for the last time
Can you read my lips, you're over time?Look into my eyes for the last time
Can you read my lips, you're over time?
