

# There's a Place

## Carpark North

There's a place that I like  
It comes from within  
And it starts  
when I fall asleepIt's the thing inside you  
that we call consciousness  
And it works eatherwayAll I want to do is sub-usual  
Something I can't define  
Can't you feel it?  
Can't you see it?  
Is it something extraordinary?When I sleep, I am there  
The place no one knows  
It's my world  
where I fall asleepAnd it's great to be there  
'Cause here I am free  
From all the degrading things...All I want to do...It's for you, this place of mine  
Behind skies and stars  
When the world falls asleepAll i want to do... (x2)
