

# Think It Over

**Buck Owens**

When I woke up this morning you were gone the note on your pillow said so long  
The things that seemed so right now seem so wrong  
As I'm left alone to face each empty dawn  
Think it over don't let love fade away think it over is there nothing left to say  
Leave your pride meet me half way think it over don't let it end this way  
[ steel ]  
Well I'd be glad to take you back again and share with you my love that never ends  
Without you my world's not worth living in so think it over and let's try again  
Think it over don't let love...
