

Vibrato

Paul Gilbert

I didn't know it was late until I saw the moon
Didn't know it was summer 2 weeks into june
Didn't know you were standing right outside my door
I was busy just listing to my vibrato I've been using vibrato since I was a kid
I didn't use it this time imagine if I did
It can lift a big wave and it's so powerful
Everybody just listen to my vibrato I've been using vibrato since I was a kid
I didn't use it this time imagine if I did
It can lift a big wave and it's so powerful
Everybody just listen to my vibrato It's a natural feeling when I make a sound
Take a regular note and move it all around
You can take up fast or take it nice and slow
Keeping busy just listening to my vibrato x3
Everybody just listening to my vibrato
