

Cloud

Pedro Gabriel Amaral

I wish I could touch
That part of skin that blinks your eyes
I wanna bring them down
Like we do when someone dies
Eyes that can flood a farm with hay
So many things unsaid I am inside a cloud
Your shade my eyes can find
Your voice don't talk so loud
While the surroundings use your mind
Please take this chance of getting away
With me you will be safe Behind four walls
Beyond the deepest doors
It is, it's the place where we will meet
It's the place where we will meet You're everything I feel
This cloud is in its time to cry
The light looks like an eel
And the noise shall make us die
The rain comes down it wets your hair
You simply won't even care Put it behind your ears
For me it feels so heavenly
And when the fear nears
It is with me you wanna be
Storm is coming they ring the bell
The cloud will cast its spell Behind four walls
Beyond the deepest doors
It is, it's the place where we will meet (let us out of here)
It's the place where we will meet (let us out of here) For some
You might be impossible
For one
You are really lovable Into a place where we will meet
