

# Go To Sleep

Dan Bern

Enough of this throat singing already  
If you wanna sing two notes at once  
Why don't you do like everyone else  
Get a multi-track machine  
Lay 'em down separately  
Make a little harmony  
Maybe a bass track  
Like one from the Rolling Stones  
None of this long lost art  
This archaic stuff  
Go out and make something  
If you wanna make some dough  
You oughta invest in my company  
We're putting barcodes  
On the fetuses  
Using ultrasound  
And laser technology  
We used to do babies  
But some of them still got mixed up  
This takes care of that  
My love, go to sleep  
We'll wake you tomorrow  
My love, go to sleep  
We'll wake you tomorrow  
There's some tomatoes  
Chemically engineered  
They come out square  
To fit in boxes  
There's some people  
Chemically engineered  
They come out square  
To fit in boxes  
I'm sitting on the roof today  
All by myself  
Not saying nothing  
To no one  
I'm sitting on the roof today  
All by myself  
Not saying nothing  
Goodbye
