

Build An Army

Fightstar

We'll hold this off to build these machines
Crush these empires to ashes and make them wonder
Just look out of your window and you'll find us here
We can make a stand to stop the uproars
If you can fight in wars for that
Crush these empires to ashes and make them wonder
If you could give us the answers now
Help us to end all the suffering
We'll clean the blood from all of our eyes
Take the rage away from us
If you could us the answers now
We could crush these empires to ashes and make them wonder
I hope that in time that I'm okay with all of this
