

Johnny Delusional

FFS

[Verse 1]

Words are in my head but I can't enunciate them clearly
Headphones on your head, they prevent a chance to even try
Some might find me borderline attractive from afar
But afar is not where I can stay and there you are[Chorus]

Though I want you
I know I haven't a chance

Still I want you

Johnny Delusional here[Verse 2]

I know "yes" and "no" in a couple dozen other languages
But your form of "no" is the kind of look I can't deny
Tell me, are resistance and stupidity the same?

Tell me, is resistance so enticing? Please explain[Chorus] x2[Bridge]

(Though I want you)

Paging Mr. Delusional

You're wanted at the desk

Paging Mr. Delusional

You're wanted at the front desk

Wouldn't it be terrible if there's no music there?

Wouldn't it be terrible if she don't want you near?

Wouldn't it be terrible if there's no music there?

Wouldn't it be terrible if she don't want you near?[Outro] x2

(Wouldn't it be terrible if there's no music there?)

Though I want you

I know I haven't a chance

(Wouldn't it be terrible if she don't want you near?)

Still I want you
