

# Lights In The Darkness

**David Hasselhoff**

Darling - why are you crying ?  
I know it hurts to lose someone you love  
But you know what - life can still be beautiful  
And baby, let me also tell you this :  
There is so much sadness in this world  
But you have so many things which other people don't have  
So think positive  
Life must go on and trust me  
The world will change  
The lights in the darkness will shine for the people in russia  
Europe will win, perestroika from poland to romania  
The lights in the darkness will shine  
There's no reason to cry all day  
Millions of people are dreaming to live like you  
The better way  
The lights in the darkness will shine for the people in russia  
Europe will win, perestroika from poland to romania  
The lights in the darkness will shine  
There's no reason to cry all day  
Millions of people are dreaming to live like you  
The better way  
The lights in the darkness will shine for the people in russia  
Europe will win, perestroika from poland to romania  
The lights in the darkness will shine  
There's no reason to cry all day  
Millions of people are dreaming to live like you  
The better way
