

# Power Tool

## 40 Below Summer

I shut your eyes and I fed you lies  
I'm up inside, now I cannot hide  
Those burns on your skin  
And the stains on your grin  
I took your pain  
Now you're dropped again I can't feel the way you want me to  
I'll use you, abuse you, conveniently lose you  
And I can't feel the way you want me to  
It's just, just my power tool Who takes your hand?  
Who makes you dance?  
Who's in your pants?  
Your lover, player, president I can't feel the way you want me to  
I'll use you, abuse you, conveniently lose you  
And I can't feel the way you want me to  
It's just, just my power tool You lose, don't confuse what I say  
I took you then threw you away  
You're through, don't misconstrue what I said  
All I wanted was just a little head You lose, don't confuse what I say  
I took you then threw you away  
You're through, don't misconstrue what I said  
All I wanted was just a little head I can't feel the way you want me to  
I'll use you, abuse you, conveniently lose you  
And I can't feel the way you want me to  
It's just, just my power tool You lose, don't confuse what I say  
I took you then threw you away  
You're through, don't misconstrue what I said  
All I wanted was just a little head You lose, don't confuse what I say  
I took you then threw you away  
You're through, don't misconstrue what I said  
All I wanted was just a little head I threw you away  
I threw you away  
I threw you away I can't feel the way you want me to  
I'll use you, abuse you, I'll use you, abuse you  
I can't feel the way you want me to  
It's just, just my power tool
