I Am Chemistry

Yeasayer

[Verse 1]
I'm digoxin from the foxglove plant
The last remaining VX from Anniston
I'm an ACN and I'm DDT
Tap into your spine
I am a chemistry[Verse 2]
It's a gas, a sarin for high tea
A C4H10FO2P puts you on your knees
A sulfur dichloride with ethylene
I say it again: I am a chemistry[Break]
She doesn't need my help poisoning the well beneath the rue leaves
She only needs my help pleasuring herself beneath the rue leaves[Bridge: Suzzy Roche]
My mama told me not to fool with oleander
And never handle the deadly quaker buttons again
My mama told me not to fool with oleander
And never handle the deadly quaker buttons again
My mama told me not to fool with oleander
And never handle the deadly quaker buttons again
