

Just a Dream

Great Northern

Was I dreaming?
Was I awake?
Or did you come home
Today? For the rest of my life
A little pity
For the rest of our lives
A little pity Pick up your stones
And go to work on my bones
And then tell me if they'll be alright
I'll come 'round for this moment
The only other moment
To see you when you're down I'll come 'round, I'll come around
See you when you're down
This is a mistake Long roads never cast
The long burning embers of your heart
When the sun rose, the surface
It removed the reflection of you Long roads don't mean anything to me now
They're gone and done
Into the sun for now Pick up your stones
And go to work on my bones
And then tell me if they'll be alright
I'll come 'round for this moment
The only other moment
To see you when you're down I'll come 'round, I'll come around
See you when you're down
This is a mistake
