

Together We Stand Alone

YOHIO

That pretty face has made you weak
and I guess that leaves me to be the one to set you free
You wanna break me? Go ahead!
I'll just bend and bounce back right in your face Pray for mercy cause you're bound to fall
We'll be the ones to roll the dice In the end it's always up to you
if you will drown or make it through
Life is yours to live
This world is trying to break down
all of the things that make you frown
Don't you let them win TOGETHER WE STAND ALONE So try to stop us if you dare
Our revolution is for the ones who doesn't care
You stabbed our backs a time or two
now our retribution strikes down on you This time you will have to pay... the price
Our paradise is your demise In the end it's always up to you
If you will drown or make it through
Life is yours to live
This world is trying to break down
all of the things that make you frown
Don't you let them win TOGETHER WE STAND ALONE In the end it's always up to you
If you try to make it through
Life is yours to live
This world is trying to break down
all of the things that make you frown
don't you let them win TOGETHER WE STAND ALONE x3
