

# Man On the Run

## Bush

See yourself in this  
I know the way you wanted  
It's slow to the beyond She gave me nearly everything  
Kiss of life and everything in between  
A dynamite and we disappear  
Like smoke on horizon Thought that I could lean on you  
Forever, forever Man on the run  
You better step aside  
Man on the run  
Running for his life  
Man on the run  
Racing through the balance  
Racing through the balance Time waits for no one  
Feel the walls closing in  
My mind spins like helicopter blades I never thought to be here now  
The warning signs were so unclear  
We could chase our busted dreams Man on the run  
You better step aside  
Man on the run  
Running for his life  
Man on the run  
Racing through the balance  
Racing through the balance Man on the run  
You better step aside  
Man on the run  
Running for his life  
Man on the run  
Racing through the balance  
Racing through the balance Man on the run (man on the run)  
Man on the run (man on the run)  
Racing through the balance  
Racing through the balance
