

# Try It

## Russ

I Dare you to go and try it but nobody shaking round here yes i got it so you want  
but i aint see you here last year  
Bet you wont tryyyyyyyyyyyyyyyyy it (oh no)  
bet you wont try it (yeah)  
your favorite rapper cant fuck with me  
girls fall in love with me  
childhood dreams  
yeah im fighting for my custody  
theirs one of me theirs a lot of you  
listen to the radio and its probably you  
but who are you i don't even think you know  
they don't believe that i planned it like Pluto  
I'm interrupting the conversation  
enough with the observation I'm fucking up the structure standing up for the population this real shit coming  
thru your playlist family needs food bills need payments but i see money and the bank with my name on it  
rearranging rules yeah I'm changing up the game on you  
I got a chip that weights the size of a brick  
I might flip and do some shit that's gonna help me get rich quick  
This ain't a thing you should try  
I protect this with my life  
Because my life is what i gave  
for my life i would die
