Total Bummer

NOFX

Go away, sunny dayAll the horny people sitting in front of their TV and thinking

What is wrong with me, Im not a monster

Why wont anybody fuck me, I dont wanna live life lonely

Why does everyone have to be perfectGo away, sunny dayAll the bar flies sipping whiskey, fighting ever present pity

Wondering what they are sucking back for
Is it the drink or trepidation? Watching all trains leave the station
Left standing alone without a ticketYou light up my life
You give me hope to carry on
You light up my days

And you light up my lifeGo away, sunny dayStop searching 'cause theres no answer just a long line of disaster

Theres no simple way to stop the sadness

Lifes not fair, Im glad its not, this isnt heaven just a lonely planet

On the verge of self destruction
