

# Drop The World

NOFX

He won the race the judges concluded  
He was the betterman he'd come from victory  
A hesitation a one time show or place  
His self would not allow he had to be the bestHe had denied his urges cause they would of  
Drained his strength that battle had been one  
With side effects a few  
He may have dropped the world  
He could not let us down  
Dana has gone away  
I hope she's in a better placeShe aced the test a grade above the rest  
Of the class felt the curve a 93%  
Was not enough to feed her fix  
She needs that perfect score  
The endorphin rush she loved  
It would opiate herShe had denied all allegations of her loneliness  
The battle had been won with scars still under wraps  
She may have dropped the world  
She would not let us down  
Endorphin rush she loved  
She may have dropped the world
