Fall Down

Toad the Wet Sprocket

She said "I'm fine, I'm okay" cover up your tremblin' hands
There's indecision when you know you ain't got nothin' left"When the good times never stay
And the cheap thrills always seem to fade away
When will we fall?
When will we fall down?Hey jump back, got to get out of here
Been too too long this time
Hey jump back, got to get out of here
When will, when will we fall down?She hates her life, she hates her skin, she even hates her friends
Tries to hold on to all the reputations she can't mendAnd there's some chance we could fail
But the last time someone's always there for bail
When will we fall?
When will we fall down?Hey, jump back, got to get out of here
Been too too long this time
Hey jump back, got to get out of here
When will, When will we fall down?
When will we, when will we fall down?
When will we fall?She said, "I'm fine, I'm okay" cover up your tremblin' hands
There's indecision when you know you ain't got nothin' left"For the last time conscience calls
For a good friend, I was never there at all
When will we fall?
When will we fall down?Hey, jump back, got to get out of here
Been too too long this time
Hey jump back, got to get out of here
When will, When will we fall down?
When will we, when will we fall down?
When will we fall?
