

Straight Ahead

David Cook

I've got questions for you
You've got answers untrue
I can walk these circles all night long
 Take a pill and sleep off
 Everything you can think of
 Walking all these circles to a song
 Could you play me something new?

 So take a minute just to breathe
 And think of everything you wanted
 And what you got instead
 Is it a labor just to see
 Around the left, the right, over my head
 To straight ahead

 Find a new way to feel right
 Between this time a fistfight
I can read the circles 'round your eyes
 This is life, this is no rhyme
 Find a beat, find the right time
 To organize the circles to a song
 Could you play me something new?

 So take a minute just to breathe
 And think of everything you wanted
 And what you got instead
 Is it a labor just to see
 Around the left, the right, over my head
 To straight ahead, yeah

 So take a minute just to breathe
 And think of everything you wanted
 And what you got instead

 So take a minute just to breathe
 And think of everything you wanted
 And what you got instead (what you got instead)
 Is it a labor just to see
 Around the left, the right, over my head
 To straight ahead, yeah
