

Firebug

JD McPherson

Burn it up, burn it down let it burn across the town
My heart will catch on fire when my firebugs around

Firebug, Firebug
She's my little firebug
She can light a fire with little bitty kiss and a hug

I took her to the winter ball she melted all the snow
That little girl starts dancing now she torches up the floor

Firebug, Firebug
She's my little firebug
She can start a fire when she be just a cuttin' up a rug

Try to make my killer move a lonely summer night
She strung me out and lit me up like Christmas in July

Firebug, Firebug
She's my little firebug
She can light a fire with little bitty kiss and a hug

Burn it up, burn it down let it burn across the town
My heart will catch on fire when my firebugs around

Firebug, Firebug
She's my little firebug
She can light a fire with little bitty kiss and a hug x2
