

Night Eternal

[Moonspell](#)

Come morning, chalice of dawn
To crown the sufferer in their glory
Come, for we are failing
Come, for we are waiting
For we are trying to breatheFirst in the skies, apocalypse
Only your fury can set us free
Come for we are failing
Come for we are waiting
For we are trying to breedNight eternal, our world is burning, bride eternal
Night eternal, our world is burning, bride eternal
Our world is dying, our world is dyingCome forth, for we are blood
And to blood we shall return, returnAnd I saw the woman drunken with the blood of saints
And with the blood of the martyrs of JesusNight eternal, our world is burning, bride eternal
Night eternal, our world is burning, bride eternal
Our world is dying, our world is dying, our world is dying
